About This Course ix
How to Take This Course xi

1 An Introduction to Financial Forecasting 1
What Is a Forecast?
Why Do Firms Forecast?
Three Critical Questions
The Critical Role of Assumptions
Identifying Relevant and Significant Forecasting Assumptions
The Absolute Requirement for Internal Consistency
Sensitivity Analysis
Varying Assumptions to Examine What-if Scenarios
Three Basic Forecasts
Review Questions

2 Understanding the Forecasting Environment 17
Situations that Call for Forecasts
Forecasting Revenues
Forecasting Critical Production Costs
Forecasting Cash Balances
The Forecastability of Financial Variables
Market Efficiency and Variables with Poor Forecastability
Variables with Good Forecastability
Managerial Issues in Forecasting
Understanding the Business Environment
Financial Management's Role:
Creating Forecasts or Evaluating Them?
In-house Development Versus External Purchase
Sources of Free Forecasts

Issues Regarding Data Collection
Data Selection
Data Access and Verification
Compatibility of Files
Update Considerations
Data Security
Review Questions

3 Judgmental Forecasting 33
Judgmental Forecasting Defined
The Central Role of Informed Judgment
Common Problems in Judgmental Forecasting
Judgmental Forecasting Techniques
The Delphi Technique
The Delphi Technique at Work
Review Questions

4 Time Series Forecasting 49
Time Series Analysis
Graphic Analysis
Level of Aggregation
Decomposition of a Time Series
Moving Averages
Why Use Moving Averages?
Applying the Moving Average to a Time Series
General Comments on Moving Averages
Applying Simple Regression to a Time Series
Appendix A: Smoothing Techniques
Applying Weighted Smoothing to a Time Series
General Comments on Exponential Smoothing
Appendix B: Simple Regression Analysis
Deviations and Sums of Squares
$R^2$
Degrees of Freedom
The t Statistic
Review Questions

5 Causal Forecasting and Multiple Regression Analysis 79
Causality
Using Multiple Regression to Forecast a Time Series
Forecasting Housing Starts
Interpreting Regression Output in Lotus 1-2-3
Basic Assumptions of Multiple Regression Analysis
The Effect of Forecast Length on Accuracy
The Forecast Results
Review Questions

6 Forecast Evaluation and Issues in Computer-Based Forecasting 101

Evaluating a Specific Forecast
Measuring the Differences Between Forecasted and Actual Results
The Relationship of Forecast Error to the Basic Forecasting Model
Evaluating a Regression Model
Evaluating a Deterministic Model
A Forecast Evaluation System

Computer Hardware and Software for Financial Forecasting
Decision Support Systems
Microcomputers Versus Mainframes

Review Questions
